We create space with vertical Storage Racking Systems

## Pallet Racks - Warehouse Storage Racks

**Sobo** Heavy Duty Systems consists of two basic components-Upright Frames and Beams. Beams are the horizontal members on which loads are stacked and Upright Frames are the verticals members which support the beams and transfer the load to floor, which are supplied in Powder coated in different colour combination.

## Shelving - Slotted Angle Racks

Sobo supplies prefabricated storage racks, shelves etc. as well as we can install customized shelving, pigeon-hole racks, at customer's place using heavy duty Sobo slotted angles. Sobo shelving units are 20 & 18 gauge steel with load capacities up to 630 lb (285 kg) per shelf. Our shelving can be used in multi-tier applications with access stairways and catwalks. Multi-tier or mezzanine shelving is one of our specialty areas, and we construct them two or three levels high.
